Solar Calendar

Gregorian Year 2020-2021

This book is created for the current year of 2020-2021 of the Roman Calendar Year.

- Based on the teachings of Yahweh Ben Yahweh, “Preparing For Rulership.” Time is always determined by the Sun. Every year the Sun has 12 hours of equal day and equal night. They call this the vernal equinox.

- Yahweh Ben Yahweh gave us the formula of their 28-year cycle calculation to find our way back to Yahweh’s time. Their current 28-year cycle ended in 2016. Therefore, the new cycle began in 2017. This new cycle is the only time that mankind is in alignment with the time of God Yahweh, before they add their leap year to the calendar, which happened this past February 2020.

- Yahweh Ben Yahweh taught that at the end of that 28-year cycle, the new year would begin on March 17th. On the evening of March 16th, the real vernal equinox the first day began. (The day begins in the evening. See Genesis) When you count seven days from the first day. You will find that March 23rd is the Seventh-day. The seventh day begins in the evening of March 22nd and ends on the evening of March 23rd.

- Research this for yourself. Divide 28 into 2016, and you will get 72. The equal number shows you that the year 2016 was the end of that cycle. The calculation matches perfectly with the Sun. Next, look up the time of the equinox yourself but be alert. When you search for the vernal equinox during 2017, you will find information that says that the Equinox occurred on March 20th. However, when you look at the times for sunrise and sunset on that day, you will find that the times do not match. In fact, you will find that the equal day and equal night occurs days before March 20th on March 16th. The numbers in this calculation match perfectly with the times of the Sun. This is the perfect calculation of time taught by Yahweh Ben Yahweh.

* Reference for this information, “Preparing for Rulership,” by Yahweh Ben Yahweh. Visit www.YahwehBenYahweh.com

The Solar Calendar has 365 days. Each month has 30 equal days. Then there are 5 days left in each year before it all starts again.

Days in Solar Time only have numbers and no names.

Only the 1st month of the Solar Calendar has a name. That name is Abib. The New Year begins in March. You can tell by the fact that nature begins during that time. The New Year begins with the Sun.

There are 7 days in a week.

There are 30 days, 10 hours, 29 minutes, and 3.8 seconds in each month.

There are 12 months in a solar year.

Again the solar year is measured from one vernal equinox to the next vernal equinox.

This time equals 365 days, 5 hours, 48 minutes, and 45.51 seconds.

- This year March Abib 1, the New Year, fell on Monday, March 16th, instead of the 17th (because they added a leap day in February).
- This year 2020-2021, the Seventh Day is on Sundown Saturday to Sundown Sunday. From here, all the High Holy Days are calculated.

According to the Bible, the day begins at sundown. Each day begins at sunset and ends at sunset.

“And the evening and the morning were the first day.” Genesis 1:5 KJV

Knowledge of the Sabbath Day

- According to the 10 Commandments, all of the families on the earth are commanded to observe the Seventh Day. The Seventh Day is the Sabbath of Yahweh יהוה. Exodus 20:8-11 says,

“8 Remember the sabbath day, to keep it holy. 9 Six days shalt thou labour, and do all thy work: 10 But the seventh day is the Sabbath of the Lord thy God: in it thou shalt not do any work, thou, nor thy son, nor thy daughter, thy manservant, nor thy maidservant, nor thy cattle, nor thy stranger that is within thy gates: 11 For in six days the Lord made heaven and earth, the sea, and all that in them is, and rested the seventh day: wherefore the Lord blessed the sabbath day, and hallowed it.”

- The Seventh Day is important, according to Genesis 2:2-3. This scripture says,

“2 And on the seventh day God ended his work which he had made; and he rested on the seventh day from all his work which he had made. 3 And God blessed the seventh day, and sanctified it: because that in it he had rested from all his work which God created and made.”

- All of the families on the Earth are commanded to keep the Seventh Day as a Sabbath of rest. Yahweh did not name the days. Therefore, we are not taught to keep a Saturday or a Sunday day of rest. We are taught to keep the 7th day. When one follows the Solar Calendar, the Seventh Day changes every year. Since God Yahweh did not name the days, each numbered day will be the Sabbath for a year. After seven years, it will begin the cycle again. The seven days and seven Sabbaths represents a perfect cycle. The number seven always refers to the Divine Law of perfection. Therefore, it is important that every man conforms to this and all of the Divine Laws.
- This year (2020-2021 on the Gregorian calendar), the Seventh Day is sundown on Saturday evening to sundown on Sunday evening.
- Now that you know this truth. Begin keeping the Sabbath on the right day and be blessed. By keeping this Law, it shows that we are with Yahweh.

The 12 Months of the Solar Year for this year began March 16, 2020. It ends on March 15, 2021.
